.Peace and mercy of God be upon you

A few simple things have been added to the program. It is still under trial because, frankly, the first time I program a control program for Android, it is somewhat difficult because I have no experience with the Android system hidden

.waiting for some ideas and suggestions

The program is under experience, so I neglected the shape and icons and the use of porridge in the program, leaving it the last thing

There is no God but Allah, Muhammad is the Messenger of Allah

A good start
will suffer a bit with modern Android versions like 8 and 9, good luck

A MEER and 1 other person 6 ,darks ,IRizerX

,God willing, it will not go right, my brother @NewBinary
.. currently, the most important thing is stability .. The rest will come with time
Also the sign of the respected brother is a very important thug .. not everything works on all the Api .. I
,mean, this is an increased headache if I decide to cover all Publications with the fullest possible powers

in addition to protection, are a little different on 9 and 10, but not very important .. Focus on the most important

Developer

And monster
gives you wellness, but you are not

able to produce the hack file. The
?second question does it exceed Google protection

It gives you wellness

... Click to expand

I gave it the Java path
C: \ Program Files (x86) \ Java \ jdk1.8.0_131 \ bin \ java.exe

I did not try because I used the emulator and unfortunately no one tried or gave an opinion or a suggestion about the program except our teacher Amir
